

HOW DOES GLASSCOAT PROTECT MY VEHICLE'S PAINT?

- ✓ Unlike traditional paint sealants and waxes that merely "coat" a vehicle's painted surfaces, producing a temporary shine, GlassCoat chemically reacts with a vehicle's paint, creating an extraordinarily deep and durable ceramic barrier. A GlassCoat treatment can actually increase the glossiness and thickness of a vehicle's paint by as much as 10%, technological accomplishments that are guaranteed to protect your paint and seal in its shine and luster for the life of your lease.

WHAT DOES THE GLASSCOAT LEASEGUARD PROTECTION PLAN COVER?

- ✓ The GlassCoat LeaseGuard Protection plan was created exclusively for leaseholders to protect their vehicle's interior and exterior surfaces while providing them with world-class paint protection when dings occur and other end of lease concerns.

- UP TO \$2500 AGGREGATE
- \$500 PER CLAIM

Consumer Acknowledgment

I understand that neither the vehicle manufacturer nor standard auto insurance covers environmental or industrial damage to my vehicle's paint or interior surfaces. I further understand that I am financially responsible for excess wear and tear on my leased vehicle. I hereby acknowledge that I have been offered the Simoniz GlassCoat LeaseGuard Protection Plan which provides warranties and coverage for these conditions.

WHY GLASSCOAT FOR YOUR LEASED VEHICLE?

Leasing a vehicle can be a great alternative to vehicle ownership. However, because you don't actually *own* a vehicle when you lease it, you are responsible for returning it in good condition, completely damage-free inside and out, at the end of your lease agreement.
